### **Letter of Recommendation – Melbourne Commercial Interiors**

To whom it may concern,

As the President of the St Kilda Army & Navy Club RSL Sub-Branch and as the internal project manager for Project 2020, (major refurbishment of RSL club rooms), I am writing this letter on behalf of the general committee.

Earlier this year following an extensive tender process we awarded the contract for the refurbishment of our 1<sup>st</sup> floor club rooms to Melbourne Commercial Interiors (MCI). From the very start of our dealings with MCI we were very impressed with their professional approach, always delivering what was requested and always on time.

The team from MCI, with onsite lead Steve Harrop, demonstrated professionalism, flexibility and ability, with a constant can-do attitude which ensured that the project ran smoothly.

As the project was funded by a government grant it was essential that a tight control of costs was kept and any potential budget blow outs were avoided. This was achieved via constant communications with the MCI team. Communication was further enhanced with regular updates, including revised design drawings and photographs of the progress of cabinetry being built at the off-site factory.

MCI having an off-site factory was very important to us, as the RSL is situated in a building with private residents and having this facility meant the noise during the project was kept to a minimum.

The St Kilda Army & Navy Club RSL Sub-Branch General Committee highly recommend MCI for any type of internal commercial fit out projects. The attention to detail shown by this company is second to none and I would be happy to allow anyone to inspect their work at our premises.

Yours faithfully,

  
Ian Tanner
